

Preoperative Instructions

_____ has been scheduled to undergo surgery at Bayfront Plaza.

Your procedure is called Exploratory Laparotomy Micro-Surgical Tubal Anastomosis.

The date of your surgery is: _____

You should arrive at the Bayfront Plaza Outpatient Surgery Center no later than _____

****Lab Work Instructions:****

You must have your pre-operative laboratory testing done 7-8 days before your scheduled surgery date. A copy of the prescription for your blood work is included in this package you need to bring it for you to have your blood work completed. You do not need to fast for this lab work. You need to confirm that our office has received your results two days prior to your surgery. (Please note that a urine drug screen may be included in your pre-operative lab work and a positive test will result in cancellation of your surgery.)

Fasting Instructions:

It is important that you **DO NOT** eat or drink anything after midnight the day prior to your surgery. This includes FOOD, WATER, BEVERAGES, CANDY and GUM. Please be advised that your surgery may be **Cancelled** if you eat or drink past midnight or anytime before the procedure.

Medication Instructions:

Tylenol is the *ONLY* allowed over the counter medication prior to your procedure. Please do not take any aspirin, diet pills, herbal supplements or vitamins. You must check with your primary care physician for instructions on any other medications you have been prescribed to ensure they are safe to take prior to your surgery.

If you have any questions at all about these instructions or about the surgery please contact the office as soon as possible at **727-796-7705**.
